

 SANTA FE
SHUTTERS

H A M P T O N

LIGHT CONTROL

Santa Fe Hampton shutters offer optimum light control, allowing you to control the amount of light into your room; block light out completely by closing all the blades or enable light to flow freely through the open blades.

PRIVACY

Your choice of shutter style allows you to enhance your privacy without sacrificing natural light flow by operating the blades for the top and bottom panels independently. Choosing a café style shutter enables you to have privacy to the bottom half of the window whilst facilitating full light flow through the upper section of the window.

INSULATION

Hampton shutters are the perfect way to regulate temperature, the insulation properties of a framed shutter creates a barrier to the cool outside air entering the room through the window, whilst a white shutter reflects the heat from the sun's rays in the warmer months.

HANDCRAFTED FOR YOU

Each Hampton shutter is carefully handcrafted in the UK allowing you to enjoy your Hampton shutters bespoke to your window measurements and window style within a 2-3 week manufacturing lead time. This express service enables you to enjoy your luxurious shutters sooner.

FULL HEIGHT

All shutters are available in 63mm, 76mm and 89mm

CAFE STYLE

CHOOSE YOUR BLADE SIZE

There are 3 blade sizes to choose from:
63mm, 76mm, and 89mm.

63mm

76mm

89mm

All blade sizes are available in each shutter style

SHUTTER FRAMES

Choose from the refined selection of shutter frames to enhance the finer details of your hand-crafted shutter.

BEADED L

A minimal beaded frame presenting an elegant finish to your shutter.

CONTEMPORARY L

The perfect shutter frame for a clean contemporary finish.

Z FRAME

The perfect frame for shutters requiring fixture to the outer edge of a window recess enabling your shutter panels to open fully and sit against your interior wall.

BLADE OPERATION

Operate your shutter blades by:

CENTRE TILT

Centre tilt rod adds an additional feature to your shutter panels.

CLEARVIEW

Clearview eliminates the use of a tilt rod, blades in each panel are positioned through manoeuvring one blade.

CHOOSE YOUR SHUTTER STILE

In line with your choice of shutter frame the style of panel closure (stile) will allow you to perfect your Hampton Shutter.

ASTRAGAL

The vertical sides of the shutter panel are designed to cover the light gap, where 2 panels meet. The small lip offers superior light control.

RABBET

The vertical sides of the shutter panels have a channel and groove which interconnect to the opposing stile, offering superior light control.

HAMPTON COLOURS

Discover your perfect Hampton shutter colour. Your choice is made easier through meticulous colour hues, ranging from crisp whites, modern neutrals, dusky pinks, through to French blue and statement greys.
