## Glass Guide

### Triple Glazed

Beautifully hand assembled and soldered centre panes have the benefit of triple glazing preventing oxidation or discolouring of the lead. The easy to clean units also provide superior heat and sound insulation.

**Backing Glass Required? NO**

### Etched & Glass Bevel

Beautiful designs incorporating clear glass bevels using the latest technology to reproduce what would have originally been manufactured using a sandblasting process. **Backing Glass Required? NO**

### Traditional Glass Bevel

Incorporating hand crafted glass bevels which are applied to the glass and finished with lead work, external joints are soldered. **Backing Glass Required? YES**

### Liquid Resin Lead

This innovative technique uses computer aided design coupled with resin 'lead' technology to create detailed art work. **Backing Glass Required? YES**
